### Part II Organizational Action Attach additional statements if needed. See back of form for additional questions.

14 Describe the organizational action and, if applicable, the date of the action or the date against which shareholders' ownership is measured for the action ▶ On December 14, 2018, the board of directors of Anworth Mortgage Asset Corporation (Anworth) declared a quarterly common stock dividend which is payable on January 29, 2019 to holders of record of common stock as of the close of business on December 31, 2018. As a result of this cash dividend to common stockholders, effective January 2, 2019, the Conversion Rate at which each share of Series B Cumulative Convertible Preferred Stock (Series B) can be converted into common shares was increased. The value of the Conversion Rate increase is a deemed distribution for tax purposes.

15 Describe the quantitative effect of the organizational action on the basis of the security in the hands of a U.S. taxpayer as an adjustment per share or as a percentage of old basis ▶ The Conversion Rate increased from 5.1740 shares of Anworth's common stock to 5.2588 shares of Anworth's common stock for each Series B share. The value of the increase is \$0.005232 per Series B share. To the extent supported by Earnings & Profits, the \$0.005232 per share is taxable to Series B holders and increases the tax basis in their Series B stock. Anworth currently anticipates having adequate Earnings & Profits to support that the entire \$0.005232 per share is taxable. The amount of actual Earnings & Profits cannot be known until the close of Anworth's 2018 tax year. Should Anworth's Earnings & Profits not be adequate to support the entire \$0.005232 as taxable, this Form 8937 will be revised.

16 Describe the calculation of the change in basis and the data that supports the calculation, such as the market values of securities and the valuation dates ▶ When Anworth pays a cash dividend during any fiscal period to its common stockholders in an amount that results in an annualized common stock dividend yield greater than 6.25% (the dividend yield on the Series B stock), the Conversion Rate on the Series B stock is adjusted based on a formula specified in "Articles Supplementary Establishing and Fixing Certain Rights and Preferences of the Series B Preferred Stock." This adjustment calculation for January 2, 2019 was published on Anworth's public website and is attached to this Form 8937. The value of the Conversion Rate adjustment was then determined using a Black Scholes model to compute A) the value of the right to convert each Series B share into 5.2588 shares of common stock using Anworth's financial data as of January 2, 2019 as if the common stock dividend was already paid, and B) the value of the right to convert each Series B share into 5.1740 shares of common stock using Anworth's financial data at January 2, 2019 as if the common stock dividend was already paid. The excess of A over B is the value of the increase in the Conversion Rate.
